

Yeelight Smart Dimmer Bluetooth Wall Switch

The Smart Switch can turn the light on and off, adjust the brightness and color temperature as well as switch from day light mode to night light mode. When the cell phone and remote control are not at hand, the light switch is the perfect addition to quickly turn the light on and off without the lamp going offline in the app. But the smart dimmer is also ingenious for visitors to control the light without the app. Thanks to the low power consumption, the Bluetooth light switch has a life span of 2 years (50 times a day) with just one battery. It is compatible with all Yeelight ceiling lights.
